

# Sustainable Cities of Sweden

**CLEMSON**  
PARKS, RECREATION AND  
TOURISM MANAGEMENT  
*Study Abroad*

## Overview

Kalmar is a city situated in one of the most sustainable regions in the world, and the field trips and course work in this program are focused on a wide range of sustainability issues, such as water, energy, transportation, infrastructure, local foods, environmental impacts, business and economics, policy and ecology. This program allows you to place yourself at the intersection of biology, ecology, engineering, economics, environmental issues and policy so that you gain a deep understanding of how sustainability issues affect people around the world. The program is held at Linnaeus University, where students will participate in a summer academy that attracts over 250 students from around the world. In addition to coursework, Linnaeus University hosts internationally renowned speakers and holds optional cultural and extracurricular activities. The program is open to all majors; its broad focus using an interdisciplinary lens on the systems that impact sustainability can apply to almost any area study.

## Course Delivery

IS 2100 Cross-Cultural Awareness International Experience  
STS 1200 Sustainable Cities  
OR  
PRTM 3480- Travel Immersion Section  
PRTM 3910 Special Topics in Sustainable Cities

\*The academic program will consist of two Clemson courses (six credit-hours total).

On request, students that are rising seniors may take the Graduate Selected Topics course in place of one of these courses. Also by request, students can use the more advanced 3000/4000 level course.

## Program at a Glance

### Location

Kalmar, Sweden

### Dates

July 8 - August 14

### Application Due Date

February 15
