#### IMPORTANT NOTES

**CREDIT HOURS:** Credit hours must total **15 each semester** to complete graduation requirements in a timely manner, except if electives are taken during the summer. No more than 15 credit hours may be taken in a semester.

**STRUCTURES II:** All students must have taken the equivalent of ARCH 8710 Structures II as undergraduates or must take this course, even if this requires staying on-campus for Semester 4 and excludes other electives.

**ELECTIVES:** Any Clemson University graduate level course numbered 6000 and above. Pay attention to prerequisites, co-requisites and other requirements. Consult your graduate advisor.

**THE SCHOOL OFFERS CERTIFICATE PROGRAMS** in Clemson (Digital Ecologies; Architecture, Society and the City) and Charleston (Architecture and Community Build; Resilient Urban Design). Students pursuing a particular graduate certificate will need to complete the coursework associated with that certificate. For more information, visit the certificate program web pages at the School of Architecture website and contact the specific certificate program director.

**FLUID CAMPUS COURSE OPTIONS:** Off-campus study is an elective. Off-campus centers have limited second-tier elective options. Barcelona generally has a fixed slate of courses; Genoa may have a few options, and Charleston have more, as well as the College of Charleston nearby. For details, contact the program/resident director.

**THE GS2 PLAN OF STUDY FORM:** The GS2 form is required for graduation and it has information about graduation requirements. See <http://www.clemson.edu/graduate/students/gs2-hints.html>.
