Division of
COMMUNITY, ENGAGEMENT,
BELONGING AND ACCESS

STEM FEST is a 3-hour free community celebration of Science, Technology, Engineering & Math (STEM) for up to 1000 students and parents! Attendees can enjoy over 50 hands-on stations, experiments, demonstrations, and meet professionals from various career backgrounds. There will be opportunities to explore science, technology, engineering, and mathematics in fun and interactive ways, with stations run by collegiate and professional volunteers. Local colleges, universities, STEM organizations, and corporate partners will also have booths at the event.

What is STEM SC?

STEM SC supports the young people of South Carolina by designing and providing STEM-focused activities, programs and events for K-12 students and their families. Engaging in STEM SC initiatives offers participants a distinctive interactive, hands-on learning journey, fostering deeper understanding in STEM subjects, boosting self-assurance, and paving the way for future career prospects in STEM disciplines. Through events such as STEM Fest and STEM Saturdays, STEM SC creates an ecosystem of support for students in prekindergarten through college to explore and build STEM skills with increasing complexity and intensity.

STEM SATURDAYS expose youth to diverse STEM activities, sparking curiosity about life, education, and careers in STEM fields. Each session focuses on topics like Renewable Energy, Power, Buoyancy, Force and Motion, Simple Machines, Construction, and Coding. The event transforms a gym into a lab with 50 tables accommodating 150 to 200 students and around 75 volunteers. Each table includes at least one college and one professional volunteer for up to 4 students. During the 3.5-hour session, culturally and environmentally relevant STEM experiments engage participants in hands-on activities aligned with the session's theme. These events aim to reach under-served communities, providing access to engaging and educational STEM experiences.
